

NET BOTS SMC-(PRIVATE)LIMITED

The Most Reliable Hotel Management System

Designed specifically for offline reliability, lightning-fast operations, and total data security.

Built for the Real World of Hospitality.

Net Bots SMC built HotelSync after witnessing the struggles of hotels in remote regions like Hunza, Skardu, and Northern Pakistan, where internet connectivity is notoriously unstable.

Traditional cloud-based PMS systems (like Munshi10) completely break down when fiber cuts happen, leaving front desk staff unable to check guests in or print restaurant bills.

HotelSync was engineered to solve this. It is a 100% native desktop application that installs directly on your local network. It runs at lightning speed with zero internet latency, ensuring your hotel's operations never stop.

Our Mission

To empower hospitality owners with software that is fast, resilient, and completely transparent with no hidden recurring subscription traps.

Why Offline-First Architecture Matters

Standard web-based property management systems are a liability during internet outages.

HotelSync gives you complete ownership and uninterrupted speed.

HotelSync (Desktop LAN)

- ✓ **Zero Downtime:** Runs flawlessly without any active internet connection.
- ✓ **Instant Speed:** 0ms latency. Invoices print immediately, and menus load instantly.
- ✓ **Total Data Privacy:** Guest records and financial ledgers stay exclusively on your hard drive.
- ✓ **One-Time Cost Option:** Purchase a lifetime license and eliminate monthly software bills entirely.
- ✓ **Multi-PC Sync:** Database shares instantly across Reception, Kitchen, and Manager PCs via Ethernet/WiFi.

Cloud PMS (Web-Based)

- ✓ **Internet Dependent:** Stops working the moment PTCL/Fiber cuts out.
- ✓ **High Latency Lag:** Slow check-ins and delayed F&B tickets during peak hours.
- ✓ **Data Risk:** Sensitive financials are uploaded to a shared, third-party server.
- ✓ **Subscription Trap:** Endless monthly payments that increase as your hotel grows.
- ✓ **Offline Desync:** If WiFi drops, different devices fall out of sync instantly.

FRONT OFFICE PMS

Lightning Fast Front Desk Operations

Process guest check-ins and check-outs effortlessly in under 30 seconds. Run a quick booking search, keep an eye on clean/dirty statuses, and manage your room catalog dynamically.

- ✓ Direct guest check-in & contact details database
- ✓ Multi-room bookings and group check-ins
- ✓ Quick visual room status board (Available, Clean, Maintenance)
- ✓ Auto-calculation of taxes and late-checkout fees
- ✓ Local guest history for returning VIP clients

The screenshot displays the 'Check In - Hotel Management System' interface. It is divided into three main sections:

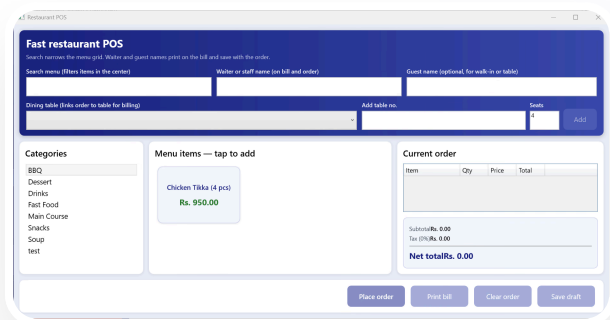

- 1. Select Guest:** Includes a search bar, a 'Search' button, and a '+ New Guest' button.
- 2. Select Room(s):** Features a 'Filter by Floor' dropdown menu, a 'Select Floor to Filter' input, and a 'Clear Filter' button. A 'Refresh' button is also present.
- 3. Booking Details:** Contains fields for 'Check-In Date' (7/6/2026) and 'Check-Out Date' (7/7/2026). It also has 'Adults' (1) and 'Children' (0) counters. A 'Discount (Optional)' section includes a 'Discount Percentage (%)' input field and a 'Confirm Check-In' button.

At the bottom, a message states 'No rooms found in the system.' and there are 'Cancel' and 'Confirm Check-In' buttons.

RESTAURANT POS

Touch-Friendly Restaurant Billing

Empower your F&B staff with a lightning-fast Point of Sale system. Manage dining tables, take walk-in orders, process room service, and split bills easily. Filter menus instantly and send orders directly to the kitchen.

- ✓ Touch-friendly interface & fast menu items search
- ✓ Direct "Charge to Room" folio integration
- ✓ Party & event banquet booking with advance payments
- ✓ Kitchen Order Ticket (KOT) auto-printing
- ✓ Inventory deduction for raw materials

OTA INTEGRATION

OTA Channel Manager Integration

Synchronize your global online room distribution automatically. HotelSync syncs reservations, live inventory updates, and room rates with major local and global Online Travel Agencies.

Two-Way Sync

Pull booking details instantly from the web to your local computer without manual data entry.

Auto Deductions

Automatic room availability deductions on OTA portals prevents costly double-bookings.

Central Dashboard

Manage pricing across all platforms from a single centralized rate-modifier screen.

Integrates natively with:

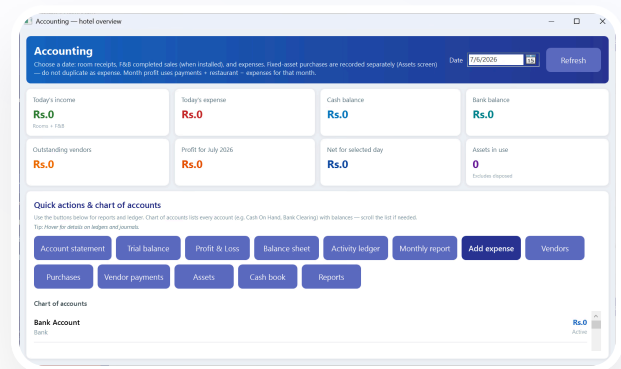

Booking.com • Agoda • Expedia • Bookme.pk

FINANCIAL INTELLIGENCE

Comprehensive Accounting Dashboard

Keep your finger on the pulse of your hotel's finances. Our accounting overview shows today's income vs expenses, bank balances, and outstanding vendors. Access your chart of accounts with a single click. Save thousands on separate accounting software.

- ✓ Double-entry Profit & Loss generation
- ✓ Trial Balance & Chart of Accounts
- ✓ Asset, Ledger, and Vendor management
- ✓ Bank account reconciliation
- ✓ Export all financial reports to Excel (CSV)

STAFF MANAGEMENT

Advanced HR & Shift Tracking

Manage your staff shifts effortlessly. Track daily attendance, assign rosters (Morning, Evening, Night), and seamlessly calculate net salaries including bonuses, advances, and overtime.

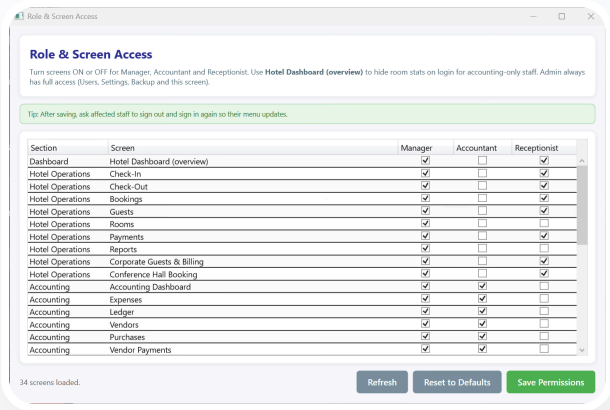

- ✓ One-click biometric or manual attendance
- ✓ Staff performance & warning evaluations
- ✓ Automated payroll processing & pay slips
- ✓ Employee advance loan ledgers

AUTOMATED REPORTING

Daily Owner Reports via WhatsApp

Keep tabs on daily revenues without being physically present. HotelSync compiles check-out summaries, total POS billing receipts, net cashbox balances, and check-ins, sending them automatically to the owner's phone.

- ✓ Automated daily shift closing reports
- ✓ WhatsApp notifications sent directly from the local machine
- ✓ Role-based screen access permissions for data safety
- ✓ Zero requirement for expensive 3rd-party SMS APIs

The HotelSync Local Ecosystem

Everything you need to run a high-tech hotel, entirely within your own local walls.

Hardware Compatibility

Works seamlessly with standard Windows PCs. Integrates immediately with thermal receipt printers (58mm/80mm), cash drawers, and barcode scanners via USB.

Multi-PC Network (LAN)

Install the main database on the Manager's PC. Connect the Reception PC, Restaurant PC, and Kitchen Display over standard WiFi or Ethernet cables. Real-time sync.

Automatic Backups

HotelSync creates daily compressed snapshots of your database. It can automatically mirror these to an external hard drive or a secure Google Drive folder when internet is available.

Role-Based Security

Lock down features. Cashiers cannot delete invoices. Receptionists cannot view profit/loss ledgers. The Owner Master Account has ultimate override capabilities.

Simple, Transparent Pricing

Choose the plan that fits your property size. No hidden fees, no per-room scaling costs.

Monthly Plan

Month to Month Cycle

Rs 4,500 / mo

- ✓ All System Modules
- ✓ Regular Updates
